**MEDIA RELEASE – 14<sup>th</sup> September 2010**

**Therapeutic Goods Administration warns on use of  
Diclofenac and Ibuprofen.**

AMA supports the call of the Therapeutic Goods Administration for caution in over the counter use of Diclofenac and Ibuprofen.

Low dose short term use is not associated with any significant cardiovascular or cerebrovascular side effects.

AMA Tasmania urges individuals to use the lowest effective dose over the shortest possible time.

Individuals who are concerned about any side effects from these medications should consult their usual doctor or pharmacist.

Dr. Aizen can be contacted on 0408 339 351 for additional comment.
